Question 11.16.3.27 Probability and Random Processes

Sarvesh K EE22BTECH11046*

Question:11/16/3/27

If the probabilities for A to fail in an examination is 0.2 and that for B is 0.3, then the probability that either A or B fails is

- 1) > 0.5
- 2) 0.5
- $3) \leq 0.5$
- 4) 0

Solution: Given,

$$Pr(A) = 0.2$$
 (1)

$$Pr(B) = 0.3 \tag{2}$$

(3)

$$Pr(A + B) = Pr(A) + Pr(B) - Pr(AB)$$
 (4)

$$= 0.2 + 0.3 - \Pr(AB) \tag{5}$$

$$= 0.5 - \Pr(AB) \tag{6}$$

By the first axiom of Probability

$$0 \le \Pr(AB) \tag{7}$$

$$0.5 - \Pr(AB) \le 0.5$$
 (8)

$$\Pr\left(A+B\right) \le 0.5\tag{9}$$
